

Tech rider DEDELAYLAY

DEDELAYLAY are two guys who's sharing music with a beautiful and strong friendship.

Tenko play keyboards and sing with loud effects on his voice. Steven play drums with effects on it.

We are here because of music and so, let's do it relax and keep cool.

We love to eat good food and we hope you too. Everybody should eat some good food.

We will appreciate if there are **no garlic, no peppers, no cabbages, no lenses and no raw vegetables** in the food you will prepare for us, thank you.

We drink beer, red wine, sparkling water, cola, coffee and tea.

We both smoke cigarettes and the drummer love to smoke **weed** before and after the show, so if you got some, it's going to be a very good concert.

Our mother tongue is french but we can speak in english, in italian or a little bit in german.

Stage plan

On stage, we play face to face. When you are on the crowd and you look the stage, the drummer is on the left and the keyboards player on the right.

We will come with our amplifier and we use them as monitor. We don't need extra monitor on stage.

We will also come with our proper mic for the vocal. The sound of the voice will go on the keyboards amplifier.

Microphones: 1 Bass drum
1 Snare
1 Floor tom
1 Rack tom
2 Over heads

Our keyboards amplifier got line out on Jack and you need to use Left (mono) line on both amplifier to get the sound of the keyboards and the voice.

For the drum's effect, the mix table got main out stereo on XLR
